leekm8474@gmail.com

Research Interests

- **Big Data Analysis**
- **Machine Learning** (Supervised / Unsupervised Learning)
- Application of Machine Learning to the Real World

Education

- Mar 13 - Feb 18(Expected) **Soongsil University, Korea**
 - Bachelor of Computer Science & Engineering , GPA : 3.99 / 4.5
- Mar 22 - Current **Machine Learning Lab, Soongsil University, Korea**
 - Research Intern

Professional Experience

- Dec 15 - Feb 16 **April Inc**, Software Development Internship
 - QA Automation with selenium based python

Awards

- 2015 **A full Scholarship** at Winter Semester (GPA : 4.33) , Granted by Soongsil University
- 2014 **Software Maestro** (Ministry of Science, ICT and Future Planning/ National IT industry Promotion Agency:NIPA)
- 2013 **The first prize at Creative Engineering Design Competition** of Soongsil University , Granted by the Dean of CSE department at Soongsil Univ
- 2013 **A half Scholarship** at Spring Semester (GPA : 4.19) , Granted by Soongsil Univ

Development Experience

- Nov 16 - Dec 16 **Research : A study on the Estimation of KBO Professional Baseball Players' salaries through Random Forest Method.** [[pdf](#)]
- Jul 16 - Sep 16 **Developer** , Founder : **A Used Transaction Relay Service** for students at Soongsil University : Most college students have common things that they used and do not use anymore such as college textbooks. These common items are often needed by other students so I developed a web service for relaying between buyers and sellers.
- Nov 14 - Jul 15 **Co-Founder(Start-up)** , **iOS Developer : A Mobile Advertisement Flyer Service Providing the latest discount information and the marketing feedback** : Many owners of supermarkets have spent much money on printing and distributing the advertisement flyers without the feedback whether it is effective or

not. So we provided a mobile-based channel for providing the latest discount information for customers of supermarkets and a web-based channel for providing the marketing feedback for owners of supermarkets.

- Jul 14 - Nov 14 **Developer : A Mobile Utility Application targeting romantic couples, Software Maestro** : Developing an android client application and a server providing necessary APIs with Node.js

Skills

- Programming Language : Python, Swift, Javascript, Java, C
- Framework : Django, Node.js
